

WHAT'S HOT AT TEC

(#1 Design Engineer is ***very*** hot):

1. We're looking for a design engineer with at least 5 years experience, a BSME (EE considered if they're mechanical in experience), Catia V5 / UG NX experience, and some background in mechanisms. Examples would include seat tracks, latches, linkages, hinges, etc. "Car Guy" types are ideal (Gear-heads, tuners, shade tree mechanics, off-road racers, etc. –anything that demonstrates a passion for cars).
2. **CAE Engineers:** Separate positions in NVH, FEA, Durability, Safety (Crashworthiness), Aero/Thermal. At least one position open in each of these categories.
3. **Engine Systems Design Release Engineer** 1 – 5 years of design/development engineering experience in intake, Cooling Systems, Exhaust Systems, Fuel Systems.
4. **Chassis Systems Design Release Engineer** - 1 – 5 years of design/development engineering experience in Chassis - Frames/Structure, Brake Systems, Suspension, Steering, Wheel & Tires
5. **Interior Systems Design Release Engineer** - 1 – 5 years of design/development engineering experience in Interior- Cockpit, Hard Trim, Overhead Systems, Seats and HVAC .
6. **Prototype Vehicle Build Engineer** - 5 years combined experience in product development, prototype build, and manufacturing
7. **Prototype Tooling and Process Engineer** - 3 – 5 yrs. of experience prototype tooling
8. **Body Prototype Parts Engineer** - 3 – 5 yrs. of experience in body sheet metal prototype part fabrication
9. **Advanced Metrology Group (AMG) Lab Engineer:** - 3 – 5 yrs. of experience in vehicle component measurement
10. **Fastener Engineer** - 5 years automotive fastener experience or 10 years of experience in fastener manufacturing.
11. **Systems Cost Engineer** - 10 Years experience in Cost Analysis and/or cost and investment estimation and quotation experience.
